UNIQUE YOUR FURNITURE BY CHOOSING MEXYTECH

If you like wood, you must like our furniture wood much more.

PS furniture wood is made from different blends of thermoformed plastics, foaming compounds, and selected process additives. It is a perfect insitution for real wood in furniture and landscape application. It not only has the natural wood texture, but also has better outdoor properties than real wood. For the actual installation, this material can be drilled, cut, sanded, planed and screwed. What is more, normal wood tools and techniques can be applied.

Compared to the real wood, our materials can provide UV resistance, free maintenance, water-proof, termite resistance, eco concepts and non deformation.

About MexyTech

MexyTech Co., Ltd have been in eco business for more than nine years. Right now, we have been a company combining R&D, design, production, recycling, marketing in one. Nowadays, MexyTech have 20 production lines and a R&D testing lab. Moreover, our products are very popular to many countries.

Furniture wood was a new product series launched in 2008. After 9 year's technical research and marketing development, our furniture wood can achieve great superiority over real wood due to the excellent outdoor properties. Our products can not only be customized according to different market demands but also provide stable quality. Therefore furniture factories would like to build long-termed partnership with us. Most of our products are supplied to local and foreign furniture factories.

Our advantages:

1. Good quality: MexyTech own a R&D lab and we will test every batch of products to make sure that our products are first-class.
2. Controllable delivery time: we get 20 production lines for different models.
3. Outstanding service: MexyTech believe customers oriented principle, so we will make sure our clients can get 100% support from us.
4. Complete product system: MexyTech provide all accessories and fittings for our products. Our clients can DIY with our installation guide.
5. Company backup: all kinds of certificates, installation guides, job-reference for clients.

Company Shows

Textures Of Furniture Wood

Original Bark Grain

It is a regular texture and looks like the wood grain of paulownia wood. Compared to sanding treatment, you can feel a concave and convex touching.

Original Wood Grain

This annual growth ring texture can meet the requirements of similar appearance to real wood. Wider boards can give a better visual effect.

3D Wood Design Series

3D wood design is an innovation design. It can give a more stereo visual effect than normal texture.

Natural Wood Sanding

This sanding texture can provide similar touch feeling to real wood and this texture is the most popular texture for outdoor furniture.

Our Advantages

Recyclable and easy degenerated. No harmful gas and heavy elements contained.

long-termed durability: no cracking, insect resistance, rot-proofing during application.

Good UV resistance and color fastness.

water-proofing, easy cleaning and free maintenance.

Colors Options

(*Colors can be customized.)
