

Installation of Blinds

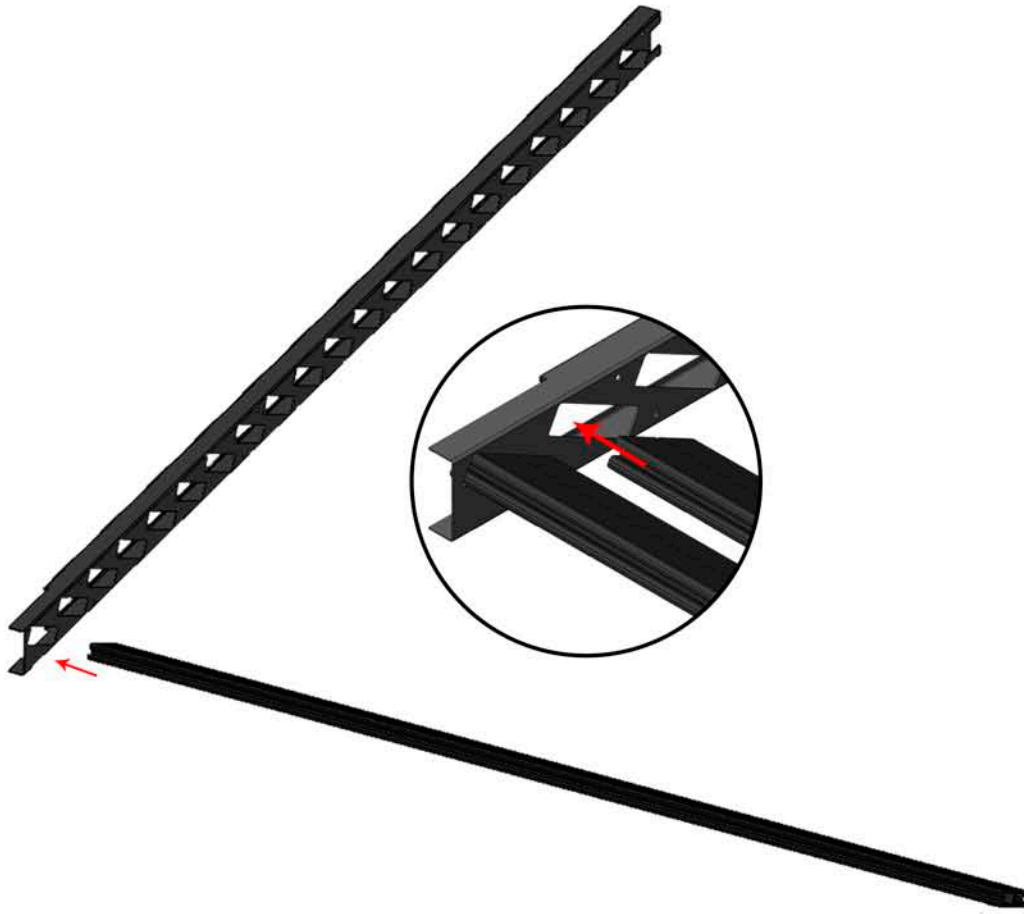

Installation Steps

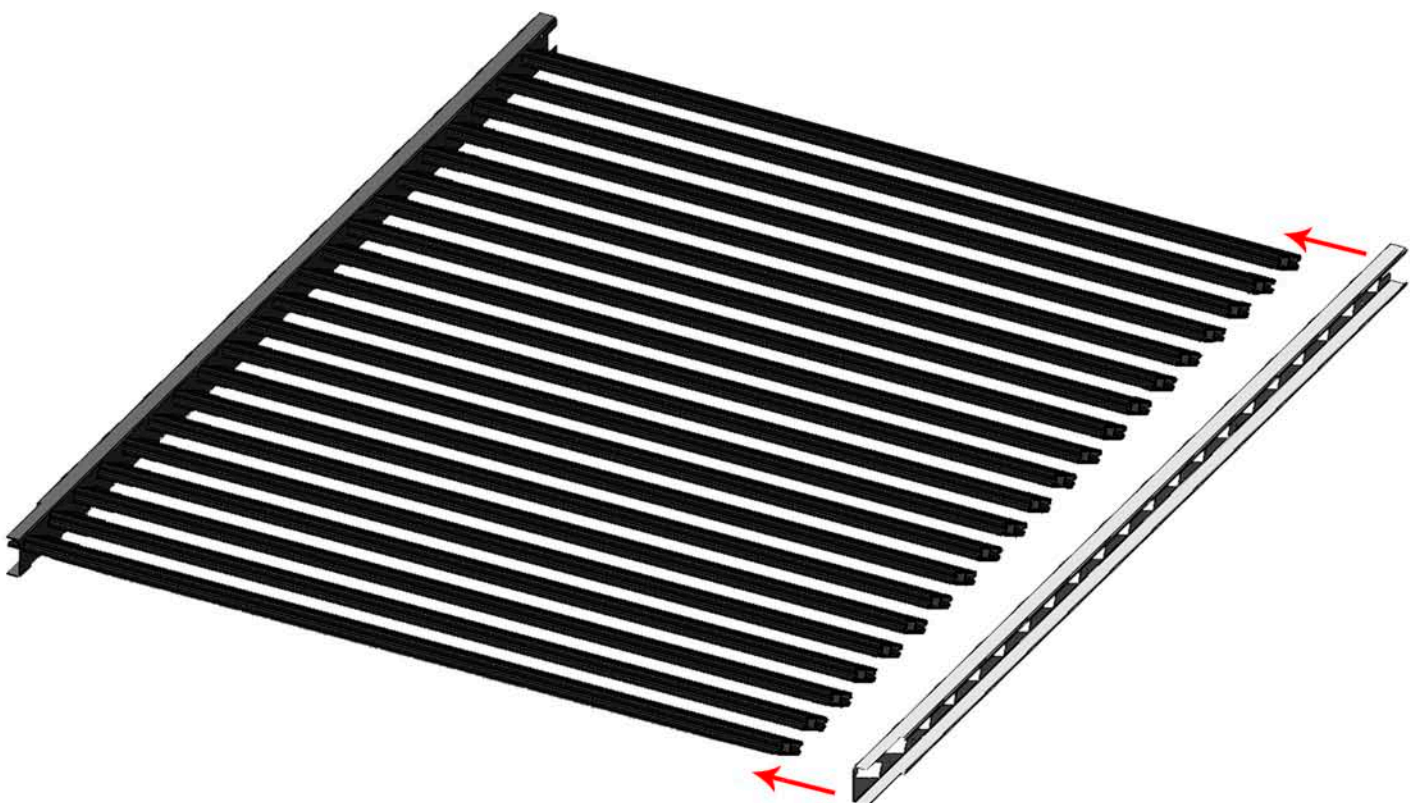

Step 1: Install the post after fixing post base. Measure the distance then install next post and keep them straight. Centering distance between 2 posts is 1800mm.

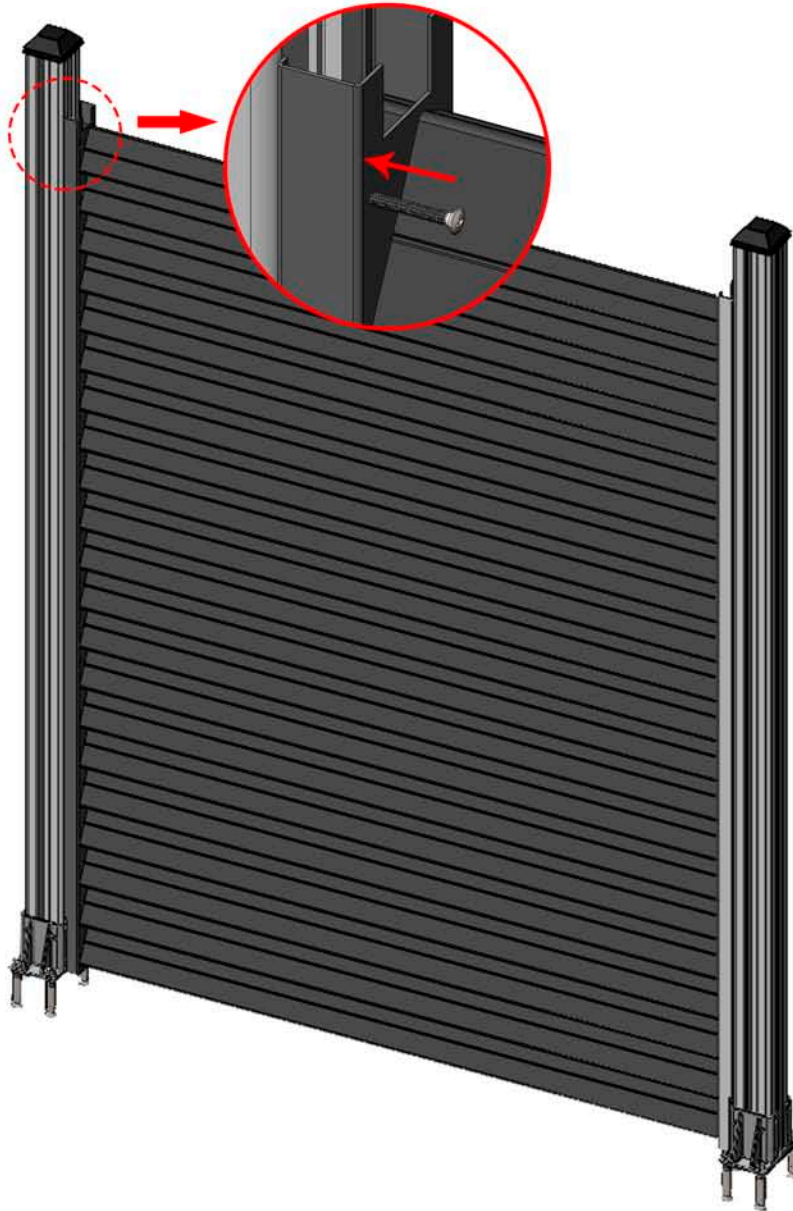

Step 2: Put fence panels into the blinds frame one by one.

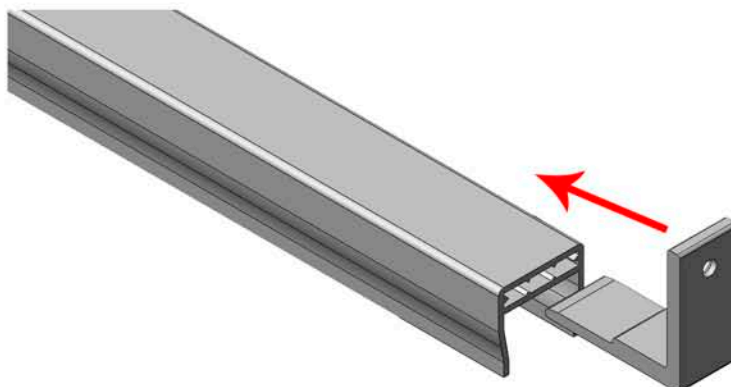

Step 3: Put the other side of fence panels into the frame.

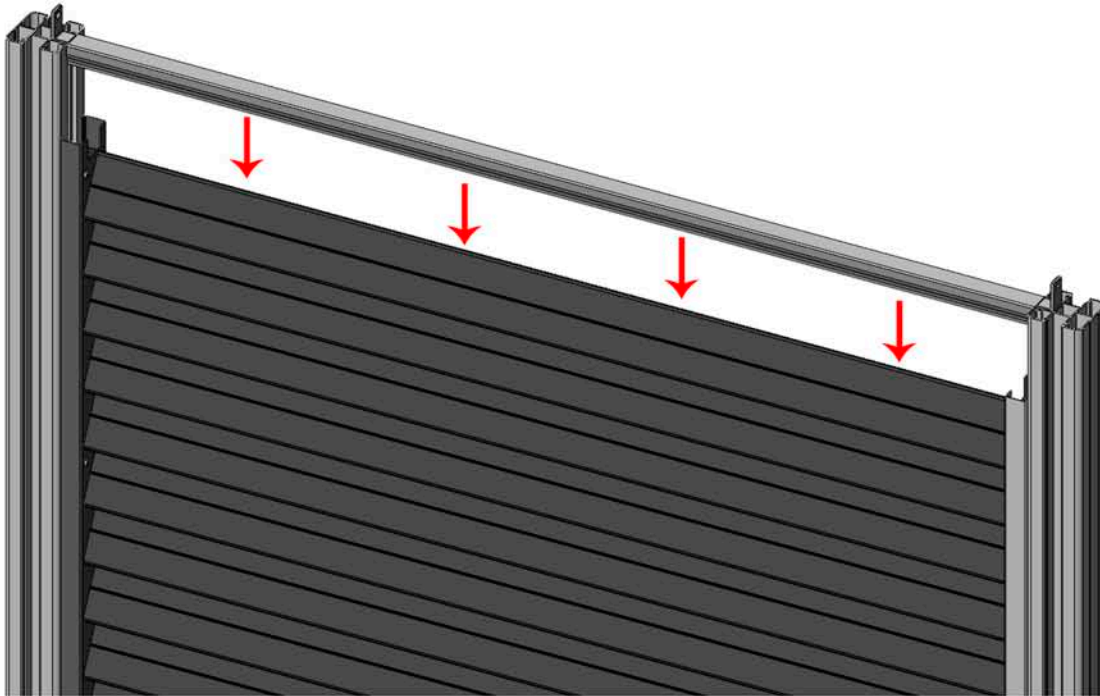

Step 4: Two people together put the installed blinds into the posts, then fix the frame to the posts by screws.

Step 5: Knock brackets into two ends of rail.

Step 6: Put the rail into the posts then fix it.

Step 7: Put post cap on, then installation finishes.
